

ACCESS AND WATER SUPPLY WORKSHEET

THIS SECTION IS MEANT TO SERVE AS INFORMATION IN THE COMPLETION OF THE WORKSHEET

When filling out this document, please be as concise with the information that is being requested as the information provided on the reverse side will allow the local Fire Authority to review the project for adequate access and water supplies. Each project is reviewed separately and is no way all-inclusive for any other projects in the future. Please consult your local authority (listed below) if you have any other questions.

All projects will receive a review and corresponding results for each project. Should you opt for alternate methods and means for compliance, the building official will need to be consulted on the requirements of what will need to be provided for a proper review. Also should you make changes to the project after a review has been completed, another review will need to be conducted by the local Fire Authority.
